SUMMARY

Junior Web Developer with hands-on experience building full-stack MERN applications using React, Node.js, Express.js, and MongoDB. Skilled in developing responsive UIs, RESTful APIs, authentication systems, and role-based access control. Motivated to continuously learn, improve technical skills, and contribute effectively within a collaborative development team.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB

Tools & Platforms: Git, GitHub, Firebase

Development Practices: Responsive Design, Component-Based Architecture, API Integration, Role based Authentication

PROJECTS

Pet Care Platform	PetMarket	Live Client Server
	• Role-based full-stack pet adoption platform with secure authentication and structured workflows. • Users can browse pets, submit adoption requests, and track status through a centralized system. • Admin dashboard enables approval, moderation, and campaign management. Tech: React, Tailwind CSS, Node.js, Express.js, MongoDB	
Educational form	EduFusion	Live Client Server
	• Full-featured educational platform for students, teachers, and administrators. • Students can enroll in courses and request teacher access. • Teachers can create classes, assignments, and monitor student progress. Tech: React, Tailwind CSS, Node.js, Express.js, MongoDB	
Product Recommendation System	LapGuru	Live Client Server
	• Product query and recommendation platform with search functionality. • Users can create, manage, and review product-related queries. • Dynamic homepage featuring a Swiper slider and recent queries section. Tech: React, Tailwind CSS, Node.js, Express.js, MongoDB	

RESEARCH WORK

Machine Learning	Travel Recommendation System Using ML
	• Developed a machine learning-based recommendation system for travel destinations. • Used user preferences and historical data to generate personalized suggestions. • Applied data preprocessing, feature engineering, and model evaluation techniques. Tools: Python, Pandas, Scikit-learn
Data Science	House Rent Price Prediction Model
	• Built a predictive model to estimate house rent prices based on location and features. • Performed exploratory data analysis (EDA) and handled missing values. • Compared regression models to improve prediction accuracy. Tools: Python, NumPy, Pandas, Matplotlib

EXPERIENCE

EDGE Bangladesh	Teaching Assistant
	• Assisted instructors in delivering technical training sessions on IT and computer fundamentals. • Supported students with hands-on lab work, troubleshooting technical issues, and concept clarification.

EDUCATION

2020 – 2025	Bachelor of Science (B.Sc.)	University of Barishal (BU)
	Subject: Computer Science and Engineering	
	CGPA: 3.45 (out of 4.00)	

LANGUAGES

English, Bangla - native
